

Compressibility Fixture

720-3000

The Compressibility Fixture is versatile compression fixture engineered to deliver accurate, repeatable thickness reduction measurements of material subjected to controlled loading conditions. Designed for use on our Vantage and Vantage^{NX} Materials Testers, the fixture provides a reliable method for evaluating the deformation characteristics of materials such as paper, paperboard, nonwovens, gasket material and flexible packaging films.

Specifications

- **Capacity:** 1 kN
- **Lower Anvil:** 2.5" Ø
- **Upper Probe:** 1.130" Ø standard
(other sizes available upon request)
- **Part #:** 00720-3000
- **Dimensions:**
Lower Fixture: 6.75" x 6" x 6" (H x D X W)
Upper Probe: 2.75" long
