

COF Fixture

Vantage^{NX} Tensile Tester

The 769-3000 Coefficient of Friction (COF) Fixture can be used with both the Vantage^{NX} Series Tensile Testers and the QC-3A Universal Testing Machine to measure the static and kinetic friction of a given material.

The fixture consists of a horizontal platform with a sample clamp and grip adapter.

A COF sled is required but must be ordered separately based on the testing needs.

COF Sled Options:

- 00225-3050 - 200 Gram Sled EZ-Sled with magnetic closure
- 00225-0218 - 200 Gram Sled (paper, paperboard, films)
- 00225-4400 - 200 Gram Sled (flexible packaging materials)
- 00225-0237 - 500 Gram Sled
- 00225-4600 - 500 Gram Sled (flexible packaging materials)
- 00225-0209 - 1000 Gram Sled
- 00225-0262 - 2000 Gram Sled
- 00225-0347 - 3 Pound Sled
- 00225-3111 - Self Adjusting 3-Ball Sled
- Custom sled options upon request

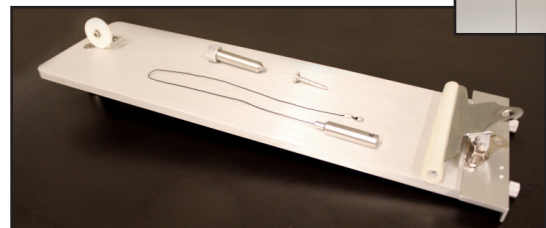

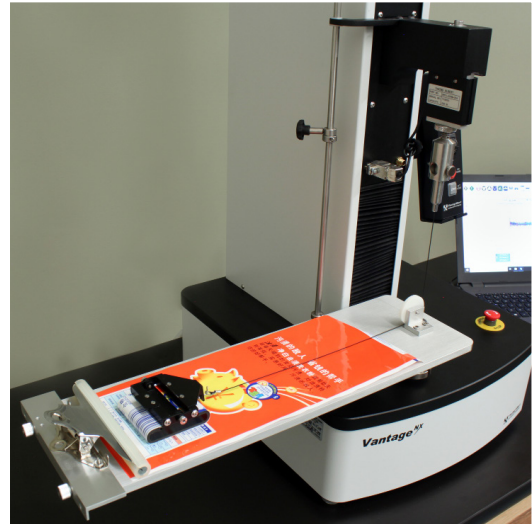

225-3050

225-0218

225-4400

Meet Industry Standards Including:

ASTM D1894, ASTM D4521, ISO 8295, TAPPI T549, TAPPI T816 and more.
