

# FP-2260 Friction Peel Tester

COF, Peel, Seal

The FP-2260 Friction/Peel Tester is a powerful and flexible testing instrument for the accurate measurement of coefficient of friction (COF), adhesion/peel strength and seal strength for a wide range of materials and applications.

Select from a variety of COF sleds along with standard and custom peel fixtures to measure at varying orientations such as 180°, 90° and "T". Mechanical and pneumatic clamps are available to provide an efficient means to perform seal strength tests. This instrument meets popular testing methods such as **ASTM D1894**, **ASTM F88** and **PSTC 101**.

The interface of the FP-2260 was designed with the user in mind. This intuitive platform allows for quick configuration of tests. Test parameters such as units of measure, test speed, test distance, test time and sampling rate can be set and saved as a test method for easy recall. Up to 30 test methods can be created, saved, and edited to facilitate testing.

For applications that require elevated temperatures, an optional heated top platen and 90° Peel Fixture are available. Featuring a digital temperature controller, the operator can set the temperature between ambient and 204°C (400°F).

#### COF Applications:

Paper, Paperboard, Plastic Film, Ink/Coatings, Foil/Metal, Fabrics

#### Adhesion/Peel Applications:

Adhesives, Tapes, Pressure Sensitive Adhesives, Lamination Strength

#### Seal Strength Applications:

Flexible Packaging, Lidding Strength

FP-2260 Friction/Peel Tester

FP-2260 w/ Heated Platen

## FEATURES

- Meets a wide range of industry standards for COF, peel and seal testing
- Horizontal testing platform
- Large test area measuring 60 x 25.4 cm (L x W)
- Automatic Load Cell recognition
- Selectable sample rates of 50, 60 or 250 dps
- Fully adjustable load cell position in the X, Y and Z axis.
- 30 Test Methods can be created and saved
- 128 test memory capacity
- Password protection

## COEFFICIENT OF FRICTION

**Spring Clip Clamp** assembly for holding samples in place.

**Heated Platen - Temp Range**  
21°C to 204.4°C (70°F to 400°F)

**Standard COF Sled Options** - 200g, 500g, 1000g, and 3lb

EZ Sled (200 g) - 00225-3050

COF Sled - 00225-4400

COF Sled (200 g) - 00225-0218

Heated Platen COF Sleds

Self Adjusting Sled - 00225-3111

**NOTE:** Custom sleds are available. Software accepts variable sled weights.

## PEEL STRENGTH FIXTURES

The 180 degree peel arm for peel testing is **included with all FP-2260 units.**

The 90 degree peel fixture is also available heated.

T-Peel Fixture

Film Blocking Fixture

Delamination Fixture

Tray Peel Fixture

## SEAL STRENGTH CLAMPS

Manual Clamps

Air Clamps

Vise Clamps - 400N

## BUILT-IN INTERFACE WITH STATISTICAL RESULTS

Easy to use interface makes it quick to set COF, Peel or Seal Strength testing parameters. Store up to 30 unique tests for efficiency when changing samples or methods.

Results are displayed and calculated based on the setup method and units of measured selected prior to testing. Review stored tests and statistics easily.

## ADVANCED ANALYSIS WITH MAP4 SOFTWARE

The option to add MAP4 software enhances the reporting capabilities of the instrument. While the software is provided with a library of test methods meeting the most common industry standards, the user can create custom test methods to meet their specific testing needs including complex motion, analysis and reporting.

- Intuitive user interface to simplify testing
- Comprehensive library of test methods
- Easily create/modify/save test setups
- Automatic graphical analysis of each test
- SQLite database captures tests automatically
- Search and recall historical data
- User defined tracking variables
- Calculated Statistics: avg, max, min, std dev, variance
- Configurable user profiles with password protection
- Automatic data export to Excel
- Complex motion and data analysis available

## PHYSICAL SPECIFICATIONS

### Dimensions (L x W x H):

24 x 13.5 x 7 in  
609.6 x 342.9 x 177.8 mm

### Shipping Dimensions (L x W x H):

29 x 21 x 15 in  
838.2 x 609.6 x 355.6 mm

**Net Weight:** 44 lb (20 kg)

**Gross Weight:** 52 lb (23.6 kg)

FP-2260 Shown with T-Peel Fixture

## COMMON STANDARDS

**ASTM D1894** - COF for Plastics

**ASTM D4521** - COF for Corrugated/Fiberboard

**ASTM D2534** -  
Coefficient of Kinetic Friction for Wax Coatings

**ASTM D3330** -  
Peel Adhesion for Pressure Sensitive Tape 180°

**ASTM F88** -  
Seal Strength for Flexible Barrier Material

**AFERA: 4001 P11**

**FINAT:** FTM 1,2,3, 10 & 11

**ISO 8295** - COF for Plastics

**PSTC:** 101 (A, B, C, D, E, F), 4, 15, 55

**TAPPI T816** -  
COF for Corrugated and paperboard

**TAPPI T549** -  
COF for Uncoated Writing & Printing Paper

**TLMI:** L-IA1, L-IA2, L-IA3

## PERFORMANCE DATA

### Measurement

Load Cell Range:  
0.5kg, 1kg, 2kg, 5kg, 10 kg

Force Resolution: 0.1g for all load cells

Force Accuracy:

10% to 100% load capacity:  
±0.25% of measured value

Less than 10% load capacity:  
±0.025% of Load Cell Capacity

Force Units:  
Grams, Kilograms, Ounces, Pounds, Newtons

### Travel Speed

Standard Speed:  
1 to 20 in/min (25.4mm to 508mm/min)

High Speed:  
10 to 110 in/min (254 to 2,794 mm/min)

### Test Times

0.1 to 99 seconds- Variable for COF, and Peel

### Travel Distance

0.1 to 14.0 in (0.3 to 38 cm)

### Test Result Readouts

**COF:** Static, Kinetic, Slide Angle, Standard Deviation of Kinetic Data

**Peel:** Average, High, Low, Standard Deviation

**Seal:** Peak

Statistical Analysis

### Power Options

110-230 Volts, 50-60 Hz
