Weighted Rollers

TA-100-FINAT

The TA-100-FINAT is a 2 kg hand roller built to the Standard FINAT Test Roller specification for preparing FTM 1 (180°) and FTM 2 (90°) peel adhesion specimens. Its floating axle applies only the roller's own weight, so operators can't add pressure by pushing down.

- Part # TA-100-FINAT
- 2 kg (4.4 lb) roller
- Steel core with Shore A 80 durometer silicone rubber cover
- Diameter: 85 mm (3.34")
  Width: 50 mm (1.97")
- Handle legs extend past the roller to protect its surface
- Slotted handle lets the axles "float," so only the roller's weight is applied
- Custom weights and sizes available on request for non-FINAT applications

Meets Industry Standards:

- Standard FINAT Test Roller
- Sample preparation for FINAT FTM 1 Peel Adhesion 180°
- Sample preparation for FINAT FTM 2 Peel Adhesion 90°
