

Cling Peel Fixture

TA62-20 for ASTM D5458

Applicable for smaller samples.

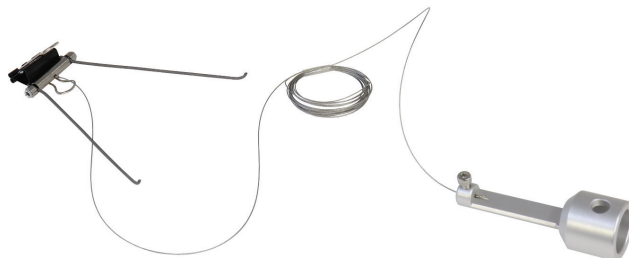

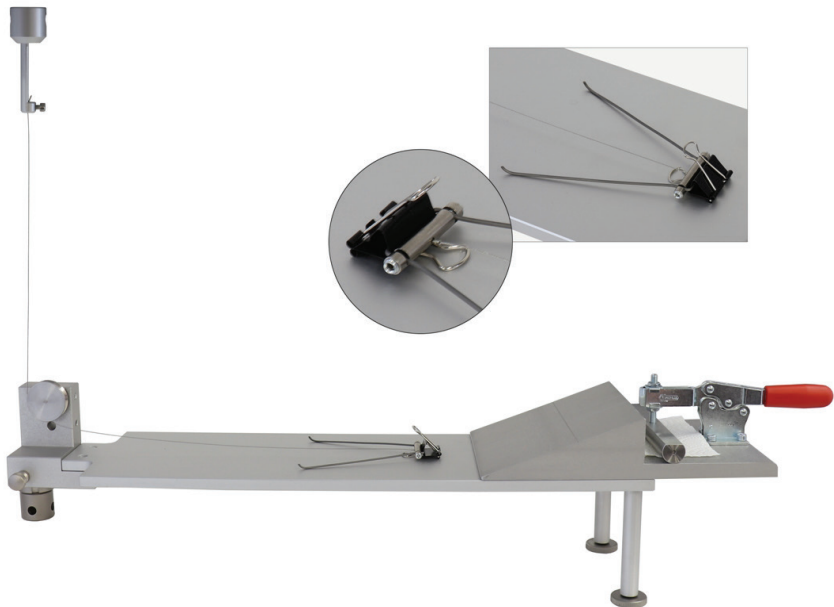

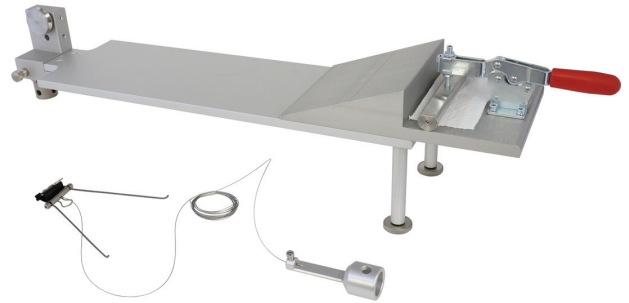

Peel cling of stretch wrap film fixture according to ASTM D5458

TA-62-20-500 = Test platen length 500 mm

TA-62-20-600 = Test platen length 600 mm

This fixture is designed to evaluate the peel cling of stretch wrap film. This is important in maintaining a tight wrap after the material is stretched.

The sample is adhered to an inclined surface per the standard method and the force to remove the strip of film is captured during the test.
